International Facility Management Kathy Roper, Lisa Borello, 2014-02-17 This up-to-date compilation of topics on the maturity and changes occurring within facility management worldwide offers insights into the growth and development of FM and its impact on today's business organisations. International Facility Management presents a comprehensive and diverse collection of topics that provides current, cutting edge research in the evolving field of FM. The editors here offer a holistic approach to both the study and the practice of facility management, incorporating the perspective of scholars and practitioners from across the globe. Topics covered deal with the changes occurring in the field today and include key research areas for both academics and practitioners. The focus is on actual practice of FM organizations – rather than on what FM should be - and the authors examine the latest techniques, models and case studies to provide a unique exploration of the new global world of facility management. Chapters here cover the changing spectrum of topics including sustainability and energy conservation, and workplace transitions for greater collaboration. The international scope and emphasis on maturity and professionalism of the field further sets this book apart from its competitors.

Multilingual Education for South Africa Kathleen Heugh, Amanda Siegrühn, Peter Plüddemann, 1995 This publication sets out to give content to the debate about multilingual education by providing both a conceptual framework and example of successful practice in bi/multilingual classrooms. Based on the firm belief in the maintenance and development of first-language medium of instruction throughout schooling, and on the need to learn at least a second language, the book argues strongly in favour of a policy of additive bi/multilingualism for formal schooling.

Learning to Read in American Schools Richard Chase Anderson, Jean Osborn, Robert J. Tierney, 1984 Learning to Read in American Schools examines critical research that offers direct implications for the design and/or evaluation of text materials used in our schools today. In so doing, it addresses issues regarding the quality of text materials, and contains specific recommendations for the improvement of reading comprehension and instruction. Timely, clearly written, and jargon-free, this text is an essential handbook for school administrators, reading specialists, teachers in professional development programs, trainers of teachers, and curriculum developers. It should have a profound impact on how reading is taught in American schools.

Culturally Relevant Pedagogy Gloria Ladson-Billings, 2021 For the first time, this volume provides a definitive collection of Gloria Ladson-Billings' groundbreaking concept of Culturally Relevant Pedagogy (CRP). After repeatedly confronting deficit perspectives that asked, "What's wrong with 'those' kids?", Ladson-Billings decided to ask a different question, one that fundamentally shifted the way we think about teaching and learning. Noting that "those kids" usually meant Black students, she posed a new question: "What is right with Black students and

what happens in classrooms where teachers, parents, and students get it right?" This compilation of Ladson-Billings' published work on Culturally Relevant Pedagogy examines the theory, how it works in specific subject areas, and its role in teacher education. The final section looks toward the future, including what it means to re-mix CRP with youth culture such as hip hop. This one-of-a-kind collection can be used as an introduction to CRP and as a summary of the idea as it evolved over time, helping a new generation to see the possibilities that exist in teaching and learning for all students.
