Antoine Vergote

Between Belief and Unbelief Paul W. Pruyser,1974 First, a scholarly work on such a hot theme as belief and unbelief requires considerable personal involvement and existential engagement on the part of the writer. My ambition to do an honest, scientific job on the topic required objectivity and faithfulness to the observations that form the starting point of conceptual inquiry and systematization. My ambition to be at the same time a clinician (which I am by profession) imposed a special selectivity: a penchant for reasoning within a useful, pragmatic theoretical framework which lacks tightness and elegance but is clinically fascinating because of its hospitality to the messy details of life, and a proneness to seeing the conflictual origins and elements in many situations which may appear pure and simple to a layman. In addition, there is something in the very nature of belief, disbelief, and unbelief that is likely to make the student a participant, at some level, in the material with which he deals.

The Beliefs of Unbelief William Henry Fitchett,1907

Belief and Unbelief Michael Novak,2017-09-29 This is perhaps the most widely read of Michael Novak's books. Belief and Unbelief attempts to push intelligence and articulation as far as possible into the stuff of what so many philosophers set aside as subjectivity. It is an impassioned critique of the idea of an unbridgeable gap between the emotive and the cognitive ? and in its own way, represents a major thrust at positivist analysis. Written in a context of personal tragedy as well as intellectual search, the book is grounded in the belief that human experience is enclosed within a person to person relationship with the source of all things ? sometimes in darkness, other times in aridity, but always in deep encounter with community and courage. It is written with a deep fidelity to classical Catholic thought as well as a sense of the writings of sociology, anthropology, and political theory?from Harold Lasswell to Friedrich von Hayek. This third edition includes Novak's brilliant 1961 article God in the Colleges from Harper's ? a critique of the technification of university life that rules issues of love, death, and personal destiny out of bounds, and hence leaves aside the mysteries of contingency and risk, in favor of the certainties of research, production, and consumption. For such a lost generation Belief and Unbelief will remain of tremendous interest and impact. When the book first appeared thirty years ago, it was praised by naturalists and religious thinkers alike. Sidney Hook called it a remarkable book, written with verve and distinction. James Collins termed it a lively and valuable essay from which a reflective, religiously concerned reader can draw immense profit. And The Washington Post reviewer claimed that Novak has written a rich, relentlessly honest introduction to the problem of belief. It is a deeply personal book, rigorous in argument and open ended in conclusions.

Between Faith and Unbelief Elisabeth Hurth,2007 This book sets out to shed light on what is specific to American Transcendentalism by comparing it with the atheistic vision of German philosophers and theologians like Ludwig Feuerbach and Arthur Schopenhauer. The study argues that atheism was part of the discursive and religious context from which Transcendentalism emerged. Tendencies toward atheism were already inherent in Transcendentalist thought. The atheist scenario came to the surface in the controversy about Emerson's new views. Contemporary critics charged that the deity Emerson worshipped was himself. Emersonian Transcendentalism thus anticipated some of the central concerns in the works of German atheists like Feuerbach. From idealism to atheism seemed but a short step.

Religious Pluralism and Unbelief Ian Hamnett,1990 The contributors examine religious pluralism from many angles, including those of sociology, anthropology, law, history and philosophy, as well as religious studies and theology. Its implications for political co-existence are also traced.

The Beliefs of Unbelief William Henry Fitchett,2023-07-18 A groundbreaking study of atheism, agnosticism, and other forms of unbelief by the British journalist and historian William Henry Fitchett. Originally published in 1905, 'The Beliefs of Unbelief' offers a comprehensive and fascinating exploration of the intellectual and social history of skepticism, from ancient Greece to the modern era. With its incisive analysis and engaging prose, this book remains a classic of its genre and a must-read for anyone interested in the history of ideas. Truth and Religious Belief Curtis L. Hancock,Brendan Sweetman,Randolph Feezell,2016-09-16 This book contains a thorough and balanced series of dialogues introducing key topics in philosophy of religion, such as: the existence and nature of God, the problem of evil, religious pluralism, the nature of religious experience, immortality, and the meaning of life. A realistic cast of characters in a natural setting engages in a series of thought-provoking conversations; the dialogue format of these conversations captures typical student attitudes and questions concerning religious belief; allows comparison of important themes throughout the dialogues; encourages the interjection of insights, observations, questions, and objections; and introduces related points when they would naturally arise, instead of relegating them to a later chapter. As well as presenting a detailed and probing discussion, each dialogue includes a list of key terms, a set of study questions, and a bibliography - all of which make this an excellent text for courses in philosophy of religion and introductory philosophy classes.

Walking Away from Faith Ruth Tucker,2002 Why do some people lose their faith?Why do some choose to abandon religious beliefs that were once meaningful to them?And what happens when they do?In this no-holds-barred book, Ruth Tucker tackles the tough questions about losing faith. Providing historical perspective, she looks at the stories of prominent Christians, like Chuck Templeton and Billy Graham, who have struggled with faith. She grapples with difficult philosophical and theological issues, exploring the intractable questions that bring people to the point of losing faith--suffering, science, answer to prayer, hypocrisy in the church, and more. Throughout the book, she explores the testimonies of some who have made the choice to walk away--and some who have returned.Tucker writes not just as a detached observer but as one who has also struggled with doubt and disappointment. In Walking Away from Faith, she shares her from her experience and tells you why she continues to choose faith. Reading her story and her interviews of others, you will find help for working through your own questions and doubts. You will also find insight for ministering to your friends, family, coworkers and neighbors who stumble between belief and unbelief.

The Culture of Unbelief Rocco Caporale,Antonio Grumelli,2018-11-27 This volume presents to the general public the reflections of a group of social scientists and theologians who gathered in the spring of 1969 in Rome to explore “The Culture of Unbelief,” and who have subsequently continued their interest in the subject. The book departs in places from the actual order of events of the symposium to accommodate papers prepared explicitly for publication after the symposium was over.—from the Editors’ Preface This title is part of UC Press's Voices Revived program, which commemorates University of California Press’s mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, Voices Revived makes high-quality, peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally published in 1971.

Atheisms Harriet A. Harris,Victoria S. Harrison,2023-05-12 Questions about how to negotiate belief and unbelief in social and public spheres are attracting an increasing amount of attention from scholars in a range of disciplines, and from concerned members of the public. This volume directly addresses the emergence of New Atheism and delves into the developing Spiritual but not religious (SBNR) phenomenon. Avoiding simplistic accounts of atheism, and of religious belief, an international panel of contributors provide readers with insights into a wide range of nuances within theism and a-theism, as well as spiritual practice and faith. Chapters cover, among other topics, Christian atheism, re-enchantment with nature, oral arguments against theism and atheist aesthetics. This collection reaches beyond Christian belief and unbelief, which is so often the milieu of atheism debates, and incorporates a range of traditions as well as the emergence of SBNR. As such, it will be of keen interest to scholars of the Philosophy of Religion, as well as Religious Studies and Theology more generally.

Dimensions of Belief and Unbelief John R. Connolly,1980

Religion, Belief and Unbelief Antoine Vergote,1997 This book focuses attention on the central elements of human religious existence. Vergote's primary aim and viewpoint are clear: to examine empirically and to interpret dynamically the psychological factors at work in the field of religion. Vergote consistently adheres to the position that psychology is neither philosophy nor theology and that its task is not to explain religion. In this work he situates religion as a cultural fact and studies how persons orient themselves to it, positively and/or negatively. Rather than emphasise and juxtapose belief and unbelief as alternative positions, he sees them as threads of experiences interwoven throughout the human existence of persons and institutions. In this context he studies motivations and their ambivalences, religious experiences and their ambiguities, conflicts between religious belief and unbelief, and the various expressions and practices of religion.

The Concept of Faith William Lad Sessions,1994 Faith lies at the heart of human life, and not just in religious contexts. But just what is faith? In this book William Lad Sessions ventures a new approach to this age-old problem. Viewing it in global terms, he provides an effective and insightful set of analytical tools for deepening our understanding of the ideas of belief.

Literature and Religious Experience Matthew J. Smith,Caleb D. Spencer,2022-01-13 This book challenges the status quo of studies in literature and religion by returning to “experience” as a bridge between theory and practice. Essays focus on keywords of religious experience and demonstrate their applications in drama, fiction, and poetry. Each chapter explores the broad significance of its keyword as a category of psychological and social behavior and tracks its unique articulation by individual authors, including Conrad, Beecher Stowe and Melville. Together, the chapters construct a critical foundation for studying literature not only from the perspectives of theology and historicism but from the ways that literary experience reflects, reinforces, and sometimes challenges religious experience.

Can Religion be Explained Away? D. Phillips,2016-07-27 As the century draws to its close, how should we think of religion? Some see it as the survival in our midst of an outmoded, primitive way of thinking, while others accuse the critics of simply being blind to the meaning of religious belief. From a different perspective, the clash between belief and unbelief is not seen as a matter of identifying incoherent systems of thought, but as a clash between different demands made on us by divergent ways of looking at the world. Criticisms will flow between these perspectives. There is, however, another kind of interest in this situation: an interest in giving just characterizations of these different voices, so that the nature of allegiances and oppositions to religion may be better understood.

Belief, Unbelief and Wittgensteinian Philosophy of Religion C. G. Crowder,1993

Advances in Religion, Cognitive Science, and Experimental Philosophy Helen De Cruz,Ryan Nichols,2016-01-28 Experimental philosophy has blossomed into a variety of philosophical fields including ethics, epistemology, metaphysics and philosophy of language. But there has been very little experimental philosophical research in the domain of philosophy of religion. Advances in Religion, Cognitive Science, and Experimental Philosophy demonstrates how cognitive science of religion has the methodological and conceptual resources to become a form of experimental philosophy of religion. Addressing a wide variety of empirical claims that are of interest to philosophers and psychologists of religion, a team of psychologists and philosophers apply data from the psychology of religion to important problems in the philosophy of religion including the psychology of religious diversity; the psychology of substance dualism; the problem of evil and the relation between religious belief and empathy; and the cognitive science explaining the formation of intuitions that unwittingly guide philosophers of religion when formulating arguments. Bringing together authors and researchers who have made important contributions to interdisciplinary research on religion in the last decade, Advances in Religion, Cognitive Science, and Experimental Philosophy provides new ways of approaching core philosophical and psychological problems.
