The New Politics of Youth Crime J. Pitts, 2000-07-31 The New Politics of Youth Crime argues that the centrality of 'law and order' to the New Labour project has generated a youth justice strategy which threatens to deepen the problems it purports to solve. Analysing the profound changes in UK youth crime in the 1980s, this book posits the French Social Prevention Initiative of the 1980s as an alternative model for a genuinely 'joined-up', social democratic response to the increasingly complex problem of youth crime in Europe.

The Hatoyama Dynasty M. Itoh, 2003-11-07 This is a multi-generational political history of the Hatoyamas, a family that has participated at the highest levels of Japan's parliamentary government from its inception in the late 1800s. The Hatoyama family is one of the most prominent political families in modern Japanese government. It has produced six members of the Diet, Japan's parliament, many of whom have served as cabinet members and party leaders. Due to the family's political legacy, they have often been likened to the Kennedy family in American politics (though they have been spared the tragedy and scandal visited upon the Kennedys). Despite the significance of the Hatoyamas to modern Japanese politics, this is the first comprehensive study available in English. In tracing the rising political fortunes of this family, it is also possible to study the role of hereditary politicians in Japan, the growth and evolution of Japanese political parties, and, perhaps most importantly, the way political leadership functions in Japan, a society known more for consensus-building than strong leaders.

Marx's Ecology John Bellamy Foster, 2000-03-01 Progress requires the conquest of nature. Or does it? This startling new account overturns conventional interpretations of Marx and in the process outlines a more rational approach to the current environmental crisis. Marx, it is often assumed, cared only about industrial growth and the development of economic forces. John Bellamy Foster examines Marx's neglected writings on capitalist agriculture and soil ecology, philosophical naturalism, and evolutionary theory. He shows that Marx, known as a powerful critic of capitalist society, was also deeply concerned with the changing human relationship to nature. Marx's Ecology covers many other thinkers, including Epicurus, Charles Darwin, Thomas Malthus, Ludwig Feuerbach, P. J. Proudhon, and William Paley. By reconstructing a materialist conception of nature and society, Marx's Ecology challenges the spiritualism prevalent in the modern Green movement, pointing toward a method that offers more lasting and sustainable solutions to the ecological crisis.

Integrative Learning Daniel Blackshields, James Cronin, Bettie Higgs, Shane Kilcommins, Marian McCarthy, Anthony Ryan, 2014-11-13 Current teaching, learning and assessment practices can lead students to believe that courses within a programme are self-sufficient and separate. Integrative Learning explores this issue, and considers how intentional learning helps students become integrative thinkers who can see connections in seemingly disparate information, and draw on a wide range of knowledge to make decisions. Written by international contributors who engaged reflectively with their teaching and their students' learning, the book seeks to develop a shared language of integrative learning, encouraging students to adapt skills learned in one situation to problems encountered in another, and make autonomous connections across courses, between experiences, and throughout their lives. More informed teachers can help students develop the necessary attributes for intentional learning, which include having a sense of purpose, fitting fragmentary information into a 'learning framework', understanding something of their own learning processes, asking probing questions, reflecting on their own choices, and knowing when to ask for help. Integrative Learning draws on international research and vast studies to provide the reader with the resources to ensure access to a unified learning experience. The book discusses conceptual and technical tools necessary for facilitating integrative learning across a range of disciplines as well as providing learning pedagogies and considers integrative learning in the context of the relevance of higher education in the complexity and uncertainty of the 21st century. It will appeal to academics and researchers in the field of higher education, as well as those generating higher education curriculums.

Language and Silence George Steiner, 2013-04-16 The evolution and manipulation of language from the celebrated author of *After Babel*. "A keenly discriminating literary mind at work on what it loves" (The New York Times Book Review). *Language and Silence* is a book about language—and politics, meaning, silence, and the future of literature. Originally published between 1958 and 1966, the essays that make up this collection ponder whether we have passed out of an era of verbal primacy and into one of post-linguistic forms—or partial silence. Steiner explores the idea of the abandonment of contemporary literary criticism, from the classics to the works of William Shakespeare, Lawrence Durrell, Thomas Mann, Leon Trotsky, and more.

Ideal Islamic Economy Abbas Mirakhor, Hossein Askari, 2017-08-11 This book provides an introduction to the vision of an economic system based completely on the Holy Qur'an—a system defined as a collection of institutions, representing rules of behavior, prescribed by Allah for humans, and the traditions of the Messenger. The authors argue that the main reason for the economic underperformance of Muslim countries and their economies has been non-compliance with the prescribed rules of behavior. Rule non-compliance has been chiefly due to the failure of Muslims to comprehend the Metaframework of the Qur'an and the Archetype Model of the Prophet Mohammad and interpret them in ways compatible with their own generation and time. Askari and Mirakhor believe these rules (institutions), properly adapted to prevailing conditions present what they consider as an ideal economic system.

Race and Policing in America Ronald Weitzer, Steven A. Tuch, 2006-06-12 Race and Policing in America is about relations

between police and citizens, with a focus on racial differences. It utilizes both the authors' own research and other studies to examine Americans' opinions, preferences, and personal experiences regarding the police. Guided by group-position theory and using both existing studies and the authors' own quantitative and qualitative data (from a nationally representative survey of whites, blacks, and Hispanics), this book examines the roles of personal experience, knowledge of others' experiences (vicarious experience), mass media reporting on the police, and neighborhood conditions (including crime and socioeconomic disadvantage) in structuring citizen views in four major areas: overall satisfaction with police in one's city and neighborhood, perceptions of several types of police misconduct, perceptions of police racial bias and discrimination, and evaluations of and support for a large number of reforms in policing.

Preaching Christ in All of Scripture Edmund P. Clowney, 2003-06-06 Voicing one theme for the entire Bible and structuring all sermons around that idea may seem to be an impossible challenge. For veteran pastor and preaching professor Edmund Clowney it will not do to preach a text from either the Old or New Testaments without fully preaching its ultimate and primary focus—the person and work of Jesus Christ. He writes, To see the text in relation to Christ is to see it in its larger context, the context of God's purpose in revelation. Clowney's rationale for emphasizing Christ's presence in the Old Testament rests on the purpose of the Hebrew Scripture. The Old Testament follows God's one great plan for human history and redemption, and the plan is not only from him but centers on him: his presence in his incarnate Son. The witness of the Scriptures to Christ is the reason they were written, so it is appropriate to emphasize this element in the Old Testament as well as in the New Testament. By offering numerous full-length examples of his own sermons that emphasize Christ as the principle theme of Scripture, Clowney illustrates for those who will never have the privilege of being his students how they can craft sermons which present Christ as the primary consideration of the text. He also offers specific instructions on preparing such a sermon. He discusses the personal habits of prayer and Bible study that prepare pastors to seek out Christ's presence. Clowney emphasizes the importance of including a specific application in every sermon so that Christ is presented both in what he says and does to reveal himself in the biblical text and in what he says and does to direct Christians' lives today. Students preparing for the pastorate, pastors desiring to increase their emphasis on Christ in their sermons, and those seeking Christ's presence in all of Scripture will find a help in Clowney's writings.
