Spacecraft Trajectory Optimization Bruce A. Conway,2010-08-23 This is a long-overdue volume dedicated to space trajectory optimization. Interest in the subject has grown, as space missions of increasing levels of sophistication, complexity, and scientific return - hardly imaginable in the 1960s - have been designed and flown. Although the basic tools of optimization theory remain an accepted canon, there has been a revolution in the manner in which they are applied and in the development of numerical optimization. This volume purposely includes a variety of both analytical and numerical approaches to trajectory optimization. The choice of authors has been guided by the editor's intention to assemble the most expert and active researchers in the various specialities presented. The authors were given considerable freedom to choose their subjects, and although this may yield a somewhat eclectic volume, it also yields chapters written with palpable enthusiasm and relevance to contemporary problems.

I, Sniper Stephen Hunter,2009-12-29 The explosive New York Times bestseller by Stephen Hunter that sends ex-Marine sniper Bob Lee Swagger into the thick of an FBI investigation and features some of the greatest gunfights ever to grace the page. It takes a seasoned killer... Four famed '60s radicals are gunned down at long range by a sniper. All the evidence—timeline, ballistics, forensics, motive, means, and opportunity—points to Marine war hero Carl Hitchcock. Even his suicide. The case is almost too perfect. ...to hunt one. Recruited by the FBI to examine the data, retired Marine sharpshooter Bob Lee Swagger penetrates the new technology of the secretive sniper world to unravel a sophisticated conspiracy run by his most ruthless adversary yet—a marksman whose keen intellect and pinpoint accuracy rival his own. But when the enemy and his deadly henchmen mistake Bob for the hunted, it's clear that some situations call for a good man with a gun...and the guts to use it.

Special Forces Sniper Training and Employment Special Operations Command, 2015-12-31 The Special Forces sniper is a selected volunteer specially trained in advanced marksmanship and field craft skills. He can support special operations missions and is able to engage selected targets from concealed positions at ranges and under conditions that are not possible for the normal rifleman. This field manual provides doctrinal guidance on the mission, personnel, organization, equipment, training, skills, and employment of the Special Forces sniper. It describes those segments of sniping that are unique to Special Forces soldiers and those portions of conventional sniping that are necessary to train indigenous forces. It is intended for use by commanders, staffs, instructors, and soldiers at training posts, United States Army schools, and units. This manual addresses three distinct audiences: Commanders - It provides specific guidance on the nature, role, candidate selection, organization, and employment of sniper personnel. Trainers - It provides a reference for developing training programs. Snipers - It contains detailed information on the fundamental knowledge, skills, and employment methods of snipers throughout the entire operational continuum. The most common measurements that the sniper uses are expressed throughout the text and in many cases are US standard terms rather than metric. Appendix A consists of conversion tables that may be used when mission requirements or environments change.
