Legend of Zelda: Breath of the Wild - The Complete Official ,2017-03-03

A Bright Power Rising Noel Coughlan,2014-04-08 Elf. Warrior. Saint.

Heretic. Monster. Despised by two peoples, this pariah might yet prove to be the savior of both. AscendantSun serves a dead god no longer. Adopting the religion of his human enemies, he haunts their mountains hoping to make amends for his past violence toward them. Now, a figure from his past threatens to restart the ancient conflict he has struggled so long to put behind him. War is coming again to the mountains, but this time he'll fight the legionaries he once commanded. Prophecy is against him. Numbers, too. But the greatest peril is the distrust of his human allies. Can he forge an effective alliance before the bright power rising in the east destroys them? A Bright Power Rising is the first volume of The Golden Rule, a two-part epic fantasy for readers who enjoy unique and intriguing world-building. Prophecy is against them. Numbers, too. But the greatest threat is mistrust. Can they forge an effective alliance before the bright power rising in the east destroys them?

Chaos Monkeys Antonio Garcia Martinez,2018-07-24 The instant New York Times bestseller, now available in paperback and featuring a new afterword from the author—the insider's guide to the Facebook/Cambridge Analytica scandal, the inner workings of the tech world, and who really runs Silicon Valley
“Incisive.... The most fun business book I have read this year.... Clearly there will be people who hate this book – which is probably one of the things that makes it such a great read.” – Andrew Ross Sorkin, New York Times
Imagine a chimpanzee rampaging through a datacenter powering everything from Google to Facebook. Infrastructure engineers use a software version of this

“chaos monkey” to test online services’ robustness—their ability to survive random failure and correct mistakes before they actually occur. Tech entrepreneurs are society’s chaos monkeys. One of Silicon Valley’s most audacious chaos monkeys is Antonio García Martínez. After stints on Wall Street and as CEO of his own startup, García Martínez joined Facebook’s nascent advertising team. Forced out in the wake of an internal product war over the future of the company’s monetization strategy, García Martínez eventually landed at rival Twitter. In *Chaos Monkeys*, this gleeful contrarian unravels the chaotic evolution of social media and online marketing and reveals how it is invading our lives and shaping our future.

Marriage Equality William N. Eskridge, Jr.,Christopher R. Riano,2020-08-18 The definitive history of the marriage equality debate in the United States, praised by Library Journal as beautifully and accessibly written. . . . An essential work." As a legal scholar who first argued in the early 1990s for a right to gay marriage, William N. Eskridge Jr. has been on the front lines of the debate over same-sex marriage for decades. In this book, Eskridge and his coauthor, Christopher R. Riano, offer a panoramic and definitive history of America's marriage equality debate. The authors explore the deeply religious, rabidly political, frequently administrative, and pervasively constitutional features of the debate and consider all angles of its dramatic history. While giving a full account of the legal and political issues, the authors never

lose sight of the personal stories of the people involved, or of the central place the right to marry holds in a person's ability to enjoy the dignity of full citizenship. This is not a triumphalist or one-sided book but a thoughtful history of how the nation wrestled with an important question of moral and legal equality.

The Johnson Years Robert L. Hardesty,1993 To mark the twenty-fifth anniversary of the inauguration of President Lyndon Johnson, a joint symposium held in Washington, D.C., and Austin, Texas, brought together seventy scholars, journalists, former government officials, and private persons whose lives have been touched by the body of legislation called the Great Society. In this publication of the proceedings, the panelists address such questions as, What was the country like before the Great Society? How did the President and his staff make it happen? How did it change American society? Would a successor program be possible today? The symposium also searches for Lyndon Johnson, the man and the president. By each contributing piece to the mosaic, the friends who were close to him, the associates who knew and worked with him, and the journalists who covered him create a picture of President Johnson that does justice to the many facets of a most complex and elusive individual.--Cover

Critical Moments Fintan O'Toole, 2003 Few figures are more respected and quoted internationally than Fintan O'Toole, both as a controversial and provocative political commentator and theatre critic. This extensive collection brings together a wide range of his writings going back to 1980. It provides a privileged insight into the great moments of contemporary Irish theatre, marking the contributions of playwrights (Carr, Murphy, Friel, McGuinness), directors (Hynes, Byrne), actors (Hickey, McKenna), and designers (Vanek, Frawley). It also demonstrates his unsettling of the usual canon, with his thoughtful arguments promoting certain playwrights who deserve to up be there with Ireland's best, including Antoine O'Flatharta, Paul Mercier, Dermot Bolger, and David Byrne.

Gemini 4 David J. Shayler, 2018-12-18 The flight of Gemini 4 in June 1965 was conducted barely four years after the first Americans flew in space. It was a bold step by NASA to accomplish the first American spacewalk and to extend the U.S. flight duration record to four days. This would be double the experience gained from the six Mercury missions combined. This daring mission was the first to be directed from the new Mission Control at the Manned Spacecraft Center near Houston, Texas. It also revealed that: Working outside the spacecraft would require further study. Developing the techniques to rendezvous with another object in space would not be as straightforward as NASA had hoped. Living in a small spacecraft for several days was a challenging but necessary step in the quest for even longer flights. Despite the risks, the gamble that astronauts Jim McDivitt and Ed White undertook paid off. Gemini 4 gave NASA the confidence to attempt an even longer flight

the next time. That next mission would simulate the planned eight-day duration of an Apollo lunar voyage. Its story is recounted in the next title in this series: Gemini 5: Eight Days in Space or Bust.
