Economic Opportunities in Freer U. S. Trade with Canada Fredric C. Menz, Sarah A. Stevens, 1991-07-03 This book provides an overview of the recently implemented Canada-U.S. Free Trade Agreement and highlights its implications for manufacturing, engineering, and technological firms and for service industries. Because the perspective is global as well as regional, the concerns of both multinational and smaller businesses are addressed. The text focuses on how the economic environment in both countries will change as a result of the agreement, and how businesses should respond to those changes. It also discusses past, present, and future trade relations between Canada and the United States and between North America and Europe. Contributors to this volume include academic authorities Richard G. Lipsey, Alan M. Rugman, Steven Blank, and Jeffrey J. Schott; Canadian and U.S. Business leaders G. Firman Bentley, Daniel Walsh, and Pierre S. Pettigrew; and government officials Gerald E. Shannon, James Tarrant, Thomas M. T. Niles, and Richard M. McGahey.

The Impact on the U.S. Economy of Including the United Kingdom in a Free Trade Arrangement with the U.S., Canada and Mexico, Inv. 332-409 ,

The Economics of Overlapping Free Trade Areas and the Mexican Challenge Ronald J. Wonnacott, Canadian-American Committee, C.D. Howe Institute, National Planning Association, 1991 This study examines the complex issue of trade liberalization in the Americas, and poses the questions: Where do we want to go and how do we get there? It examines the economics of a hub-and-spoke system versus an expanding FTA, and patterns of existing trade in the hemisphere.

Business America , 1990 Includes articles on international business opportunities.

Free Trade Between the United States and Canada Ronald J. Wonnacott, Paul Wonnacott, 1967 This study is the first major attempt to estimate what would happen in Canada if all trade restrictions between that country and the United States were removed. Refuting a number of generally held assumptions, the authors' findings indicate that Canadian industries would benefit substantially, provided that they seized the opportunities to reorganize for the large North American market. The authors then explore resulting general equilibrium pressures on wages and exchange and continue with an analysis of the historical effects of protection on Canada.

North American Free Trade Gary Clyde Hufbauer, Jeffrey J. Schott, Institute for International Economics (U.S.), Lee Ol Remick, 1992 Negotiations toward a North American free trade area (FTA) started in early 1991. This study assesses the impact such negotiations would have on the US and Mexican economies, the goals of a North American ETA, and the implications for world trade relations. Three main topics are examined: the goals of the United States, Mexico, and Canada in pursuing closer trade ties, and the appropriate modalities and timetable for achieving those objectives; the implications of prospective negotiations: what should and should not be on the table, how the US-Canada model could be applied, and/or how that model would need to be modified; and the implications for the world trading system in light of the results of the Uruguay Round of multilateral trade negotiations in the GATT.

A New Special Relationship Peter Morici, 1991 This study examines from an American perspective the impact of the free trade agreement (FTA) on the evolution of the Canada-United States economic relationship. It puts into historical context the special trading relationship between Canada and the United States which prevailed over the early postwar period. It examines how FTA rules and dispute settlement procedures create an effective basis for managing bilateral economic relationships in the context of more decentralized policy processes. It also explores the potential impact on the bilateral trading regime of the changing nature of international competition, the adjustments taking place in the structure of the Canadian and American economies, and the challenges posed by continuing technological change.
